

"When it comes to the food chain business, it pays to be SAFE"®

Ensuring safety, competitiveness and compliance:

*We work with public and private sectors to promote
safer food chains, healthier livestock
and more competitive food industries*

PLAYING IT "SAFE"
We provide innovative and tailor-made solutions, tools and training in three core areas

1 SAFE Animal Disease and Livestock Management Practices

- Emergency preparedness for animal and zoonotic disease outbreaks
- Pragmatic and economically viable disease and livestock management solutions
- Cutting-edge risk communication and behaviour change approaches

2 SAFE Food, Food Systems and Markets

- Tailor-made food safety procedures for compliance and competitiveness
- High-quality checks for product certification and enhanced marketing
- Real-world answers for the responsible use of veterinary drugs

3 SAFE Laboratories, Skills and Networks

- Validated protocols and innovative approaches for diagnostics, screening, food safety control and farm follow up
- Enhanced biosafety and certified ISO 17025 quality assurance
- Building skills through hands-on training and simulation

FOCUSED ON WHAT MATTERS

We champion innovative and comprehensive approaches to making food safety a reality for entrepreneurs, consumers and policy makers.

We believe in creating opportunities via profitable solutions and culturally and environmentally sensitive actions.

We care about the real, socio-economic impact of our activities.

We identify and foster relationships between public and private sector.

A SAFE INVESTMENT

Operating in West and Central Africa, our multidisciplinary and multicultural team leverages its 20+ years of local and global experience to make your projects successful and sustainable.

We offer you the experience and knowledge you need to develop and strengthen markets and set up partnerships for healthier and competitive food chains.
